STRIDERS

YARN TO GARMENTS:

THE TEAMWORK

At MIL Team, our dedication to our product is unwavering. Every aspect of design, from minor trims to material selection, is meticulously overseen by our in-house designer team. The core team takes a hands-on approach in crafting the vision for each individual product.

We source the highest quality yarn from premier mills or our in-house spinning unit, utilizing exclusive circular knitting machines in collaboration with our experienced channel partners.

The Ideology: The core ideology at MIL revolves around a commitment to environmental friendliness. Rather than purchasing ready-made fabric from the market, we adhere to the principle of "Yarn to Garments." Our fabric undergoes eco-friendly processing, including special finishes like compacting and bio-wash, to enhance softness and richness. Each fabric undergoes rigorous lab testing in our in-house facility or renowned laboratories to meet international quality standards. We use YKK or equivalent quality fasteners (zippers) in trousers, skirts, and Mobilon tapes in T-shirt shoulders.

Experience: At MIL, we embrace a culture of unlearning to facilitate continuous learning. To spearhead the "Revolution in Uniforms," we proudly present a diverse range of ready-made knitted school wear that allows the skin to breathe, provides a perfect fit, and stands out in design. Responding to the rising demand for knitted school wear, our R2D team has invested over 12,960+ hours in research and development of fabrics and patterns. The result is not just comfortable attire but also distinct identity for students in any institution.

Branding on garments is subtly executed on buttons, side slits, and other unobtrusive areas, preserving the garment's aesthetic appeal. With a ready fabric stock, in-house sampling, and production unit equipped with the latest stitching, printing, embroidery, and sublimation machines, we ensure faster shipment of orders.

We maintain high-quality standards with 10-12 stitches per inch (SPI) in garments, aligning with international benchmarks.
