prevention before infection

WECARE

ARVIND MAFATLAL GROUP
The ethics of excellence

WECARE MEDITEX PRIVATE LIMITED

About Us

Mafatlal Industries Ltd was established in 1905, as one of the leading Textile Mills in the country, serving the nation since last 117 years with their fine Textile fabrics and a market leader in all kinds of Uniforms.

Recently MIL has partnered with WeCare Meditex Pvt. Ltd to bring to the market the most comprehensive range of Disposable Healthcare, Hygiene and Wellness related apparels and accessories solutions.

Our products are manufactured in the state-of-the-art facility, using imported machinery and International standards under strict quality control. We use Medical Textiles and Performance Fabrics in the Infection Control Arena

OUR INFECTION CONTROL PLATFORM IS DIVIDED IN 4 VARIANTS:

Medical Disposable
Apparels

Medical Packaging

Disinfectants

Wound care

WeCare Meditex is one of the leading manufacturers & supplier of India's most comprehensive range of Disposable products in Healthcare, & Wellness in all the above 4 categories. Our USP is that all the products are produced in Positive Static Pressure Room facility with completely hands-free operation and having in-house ETO Sterilisation facility.

The products are designed to meet the specific needs of medical professionals in medical Institutions eliminating a major contamination worry in the Operation Theatre. We have adopted the primary principle of "Unconditional Customer Satisfaction" WeCare is always the solution partner of its customers by providing them with the best solutions and impact training that are results of several clinical studies.

WeCare follows the developments in the world and constantly updates all its processes. Our goal is to reduce the cost of health services whilst increasing the safety of patients and healthcare personnel.

ARVIND MAFATLAL GROUP
The ethics of excellence

About Us

WeCare manufactures in an hygienic environment within an area of approximately 5000 sq. meters. All processes in WeCare follow the requirements of ISO 9001-2018, ISO 13485, and CE standards. The sterile packaging area is a (Class 100,000) (Hepa filter) room divided into sections with controlled inputs and outputs.

Surgical Packs, Surgical Drapes, and Surgical Gowns produced with new technological machines are packaged and sterilised according to user demands. A wide range of product lines has been installed and sterilisation process is carried out with its own 350 cubic meter steriliser installed in house and all control tests are carried out daily in its own state of the art Laboratory. In addition they are validated from time to time in International accredited Laboratories.

OUR MISSION

WeCare was established to meet the needs of the sector, to produce high quality and best fitted products with innovative approaches, to contribute to customer satisfaction, safety and protection of human health.

OUR VISION

Leader in the sector, with sustainable R&D activities , example of customer - employee satisfaction and social responsibility , WeCare envisages to be a well recognised brand in the International market.

OUR VALUES

TO ENSURE A SUSTAINABLE GROWTH WITH OUR CUSTOMERS, EMPLOYEES, SUPPLIERS AND OTHERS STAKEHOLDERS.

- CUSTOMER FOCUS
- 100% CUSTOMER SATISFACTION
- TRANSPARENCY AND RESPONSIBILITY
- LEGAL COMPLIANCE
- ENVIRONMENTAL AWARENESS
- FAIR DISTRIBUTION
- SUSTAINABILITY

ARVIND MAFATLAL GROUP
The ethics of excellence

ABOUT OUR DRAPES

THE BROADEST LINE IN THE INDUSTRY

We offer you a wide range of options, which is especially designed for each purpose. Drapes feature a 2-layer basic laminated material which meets the standard.

SOME BENEFITS OFFERED BY OUR PRODUCTS:

- 100% impermeable
- High absorption capacity and speed
- Low level of linting
- Strong and durable
- Soft feel and conforms easily to the body.
- Latex free.

As an Industry leading manufacturer of surgical drapes, WeCare provides a comprehensive selection of surgical drapes and ancillary products that offers patients and clinicians the protection they want and need.

ENHANCED DRAPE FEATURES INCLUDE :

- Royal blue colour for SMS drape fabric
- Helps reduce glare from operating lights
- Provides colour contrast between drape fabric and reinforced areas for visual definition of critical zone.
- Standardised absorbent reinforcement material in critical zones.
- Creates a more consistent look , feel, and experience for clinicians.
- Enhanced reinforcement sizing on select codes

THE HIGH STANDARD O.R. DRAPES AND GOWNS

OUR DESIGN :

All our drapes and gowns are developed with the help from O.R. Professionals around the globe. While designing and developing , we have tried to add as many features as much as possible, for a better performance. The O.R. professionals have shared their experience with our team, so we did get a good sense of what features they liked and disliked about drapes and surgical gowns. Then we worked to develop an innovative line of products you can use with confidence. Some features include:

VELCRO STYLE LINE HOLDERS:

Drapes feature Velcro-style tube and line holders to place surgical lines and help keep them clear of the working area. The Velcro is easy to use, even when wearing gloves. This is one of the key features we have developed for the drapes.

TAPE AND INCISE FILM:

We use premium tape and incise film on all drapes. Our tape is manually placed to the fenestration to help prevent pooling of blood and fluid underneath the drape. Because the tape is placed manually, it allows the tape to be closer to the fenestration compared to other drapes.

LARGE IMPERVIOUS REINFORCEMENT ZONE:

Fenestrations and splits are surrounded with a large impervious reinforcement. This area absorbs fluids and is plastic-backed to make the area impervious to blood and body fluids as well as bacterial transmission.

- We recognise that each O.R. team may have different preferences in a surgical gown. That's why our gowns are available in different materials and in various combinations, to provide each user with the best gown.
- We recognise that each O.R. team may have different preferences in a surgical gown. That's why our gowns are available in different materials and in various combinations, to provide each user with the best gown.
- All gowns are cut wider in the chest and sleeves for a better fit. Our gown features an adjustable Velcro-style neck closure. This allows the neckline to easily adjust to a wide variety of people, while also helping to prevent gapping in the front which serves as additional protection against fluids

STERILE PROCEDURE TRAYS / PACKS

Today, there is increased pressure on hospital management to improve efficiency and reduce costs while minimising harm to the environment. Low prices alone are no longer enough.

You need :

- Products designed to make your process leaner.
- Outstanding service
- High Quality
- Environmentally friendly options

Designed to make surgical processes leaner; one item instead of dozens.

WeCare's Sterile procedure trays come complete with everything you need for a procedure. It is compact, ready to use and can be rendered with just one item number, instead of dozens.

Sterile procedure trays reduce set-up time, leaving more time for training patients. With fewer items to open, there is also a reduced risk of contamination. Procedure trays are assembled in dedicated clean rooms and undergo a validated ETO sterilisation process.

OUR RANGE OF PACKS

STANDARD PACKS

For commonly performed procedures, weCare offers standard surgical packs. These SPT's can help you save money, streamline your inventory, improve efficiency and create standard practices in your facility.

CUSTOMISED PROCEDURE TRAYS

In addition we offer customized packs, which allow you to design your surgical packs using a selected list of alternative components that are both clinically effective and cost efficient, without compromising the custom pack performance you expect from WeCare.

Today, hospitals are confronted with many challenges: cost cutting, efficiency increase or shortage of healthcare workers. WeCare's sterile procedure tray's (SPT's) help you target these challenges

STERILE PROCEDURE TRAYS / PACKS

WeCare's surgical procedure packs provide the following attributes:

INFECTION PREVENTION:

Protect your healthcare teams and patients from infections both in the operating theatre and patient care units.

MEDICAL TEXTILES / PERFORMANCE APPARELS

Why are more hospitals and purchasing groups choosing WeCare for their all around protection ?

We know you rely on disposable apparel to keep your staff protected and comfortable. For this reason, we use fine materials available for protection, offering a great level of comfort. We apply high quality standards to our products in our manufacturing facilities, WeCare is ISO 13485 certified. WeCare has been manufacturing protective apparel for over a decade now.

HOW TO CHOOSE THE RIGHT MATERIAL ?

SPUNBOND POLYPROPYLENE :

The standard fabric for basic protective apparel; formed by bonding fibers together to form a single layer of breathable, woven like material. Its main advantages are economy and comfort.

MULTI - PLY MATERIAL (SMS) :

This fabric consists of inner layers of meltblown polypropylene sandwiched between outer layers of spunbond polypropylene. Strong fluid resistant and breathable, this multi- layer material provides an optimal mix of protection and comfort.

POLYETHYLENE :

This single layer of Polyethylene film provides high barrier properties at a very attractive price. This film is ideal for situations when impervious properties are needed.

PREVENTIVE PLUS :

This impervious and breathable material consists of a hybrid film laminated between two layers of bi-component spunbond material. This fabric is ideal for long interventions when impervious protection is needed

GOWN

SURGICAL GOWNS

At WeCare we're committed to ensuring your safety every step of the way. By crafting surgical gowns with integrity and care, we're proud to give you everything you need, so you can be certain that you have the right gown for every procedure. When you choose WeCare, you're getting more than a physical product. We're dedicated to making sure you have what is needed to give you peace of mind.

Insights that give your staff every advantage.

Integrity that's woven into every product we craft.

A portfolio of products that accommodate every need.

SPUNLACE SURGICAL GOWNS

Spunlace gowns offer everyday protection and comfort.

COMFORT YOU CAN FEEL

The first feature you will notice about the Spunlace gown is the way it feels. The soft, cloth-like texture says "comfort" as soon as you put it on. Those who spend much of their day in a surgical gown will appreciate the comfort of Spunlace.

GENEROUS SIZING

Spunlace gowns are cut wider through the chest and sleeves for a roomier fit.

ADJUSTABLE NECKLINE

The Spunlace gowns feature a velcro-style neck closure that allows the neckline to easily adjust to a wide variety of people. In addition, the velcro-style closure helps prevent gapping in the front of the gown to further help protect against fluids. For more than 25 years, medical fabric has been considered an industry standard.

ARVIND MAFATLAL GROUP
The ethics of excellence

SMS SURGICAL GOWNS

BETTER FIT AND ADJUSTABLE

SMS gowns are roomier in the chest and sleeves to help provide a better fit. They also feature an adjustable velcro-style neck closure.

FLAME RESISTANT

SMS gowns are resistant to ignition. The fabric has a naturally low rate of flame spread and meets the Standard for Flammability of Clothing Textiles CPSC 16 CFR Part 1610.

LOW-LINTING

SMS gowns are low linting. Because they are made from polypropylene, the gowns are naturally low in lint.

THREE LAYERS OF PROTECTION

Our SMS technology utilizes three layers of fabric to provide a high level of fluid repellency. This helps provide a barrier to blood, body fluids and pathogens. The fabric features one densely- packed meltblown layer sandwiched between two strong, spunbond outer layers.

BREATHABLE AND MORE COMFORTABLE THAN OTHER SMS GOWNS

Moisture vapor escapes at nearly twice the rate as other SMS gowns, allowing you to remain more comfortable. We are committed to helping you select the best protection for each procedure. New enhancements to the WeCare Non- Reinforced AAMI Level 3 Surgical gown make it easier for you to find and select the appropriate level of protection :

AAMI Level 3 and AAMI Level 4 Surgical Gown options

Multiple size options to ensure the right fit at the right AAMI Level

Quickly differentiate between AAMI Level 3 and AAMI Level 4 gowns based on the color coded packaging and the new royal blue color of our AAMI Level 3 Non - Reinforced Surgical Gown.

UNDERSTANDING THE AAMI STANDARDS

Know the difference. It's about your safety.

All surgical gown manufacturers must meet a set of detailed standards set up by the Association for the advancement of Medical

Instrumentation (AAMI) considered the standard in surgical gown manufacturing. Based on objective tests, the standards measure barrier effectiveness against penetration from blood bodily fluids and other potentially infectious materials.

Selection of ANSI / AAMI PB70 standard recognized by the FDA

<p>Type of PPE</p> <p>Feature Tested</p> <p>Standard Designation</p> <p>Description</p> <p>Applicability</p>	<p>Gowns</p> <p>Liquid Barrier Performance</p> <p>AAMI PB70:2012</p> <p>Classifies a gown's ability to act as a barrier to penetration by liquids or liquid-borne pathogens based on four levels.</p> <p>The critical protective zones for surgical and non-surgical gowns are defined differently E the standard.</p> <p>While the critical zones designate different protective areas for the different gowns, the levels of protection are the same for both surgical and non-surgical gowns</p> <p>Liquid barrier performance is not related to the strength of the material.</p>
<p>Level 1</p> <p>Description</p> <p>Applicability</p>	<p>This standard references several other standards</p> <ul style="list-style-type: none"> • Used for MINIMAL risk situations • Provides a slight barrier to small amounts of fluid penetration • Single test of water impacting the surface of the gown material is conducted to asses barrier protection performance. <p>Basic care, standard hospital medical unit</p>
<p>Level 2</p> <p>Description</p> <p>Applicability</p>	<ul style="list-style-type: none"> • Used in LOW risk situations • Provides a barrier to larger amounts of fluid penetration through splatter and some fluid exposure through soaking • Two tests are conducted to assess barrier protection performance: <ul style="list-style-type: none"> • Water impacting the surface of the gown material • Pressurizing the material <p>Blood draw from a vein, Suturing, Intensive care unit, Pathology lab</p>
<p>Level 3</p> <p>Description</p> <p>Applicability</p>	<ul style="list-style-type: none"> • Used in MODERATE risk situations • Provides a barrier to larger amounts fluid penetration through splatter and more fluid exposure through soaking than Level 2 • Two tests are conducted to test barrier protection performance: <ul style="list-style-type: none"> • Water impacting the surface of the gown material • Pressurizing the material <p>Arterial blood draw, Inserting an IV, Emergency Room, Trauma</p>
<p>Level 4</p> <p>Description</p> <p>Applicability</p>	<ul style="list-style-type: none"> • Used in HIGH risk situations • Prevents all fluid penetration for up to 1 hour • May prevent VIRUS penetration for up to 1 hour • in addition to the other tests conducted under levels 1-3, barrier level performance is tested with a simulated blood containing a virus. If no virus is found at the end of the test, the gown passes. <p>Pathogen resistance, Infectious diseases (non-airborne), Large amounts of fluid exposure over long periods</p>

POLY-COATED SMS CHEMOTHERAPY GOWN

PRODUCT CODE
WM SG 106

- Poly-coated material for durability and protection
- Lightweight, closed-back design, secured with ties for maximum comfort
- Low-linting material helps to provide a clean environment
- Long sleeves with knit cuffs provide added comfort
- Sizes: M, L, XL, XXL

SEALING SYSTEMS

MEDICAL SEALING

PRODUCT CODE
WM MSS 100

PRODUCT NAME:

POUCHMATE (Automatic Cutting and Sealing Device)

PRODUCT DESCRIPTION:

AUTOMATIC CUTTING & SEALING

Adjust the required pouch length and needed quantity then start the program. Pouchmate will produce ready to fill pouches fully automatically. It can also be used as a cutting machine separately to meet your special length demand from 50mm up to 1.000mm.

MULTIPLE REEL LOADING

Up to total load width of 40cm, the Pouchmate can be loaded with different reels of varying widths. Determine your needs, start your operation and increase your productivity by multiplying your outcome.

IN-FEED SEALING

Filled pouches can be easily sealed with Pouchmate. The adjustable sealing speed feature helps to manage your high volume operations without compromising seal quality.

PRODUCT CODE

Dialysis Dressing Kit (Gauze, Cotton Ball, Disposable Towel, Disposable Bowl, Tray)

PRODUCT CODE
WM MSS 101

PRODUCT NAME:

ROTARY SEALER WITH AND WITHOUT PRINTER

PRODUCT DESCRIPTION:

- Solid, durable housing
- Constructed from sanded stainless steel for hygienic use
- Multi-line seal
- Temperature control with microprocessor
- Temperature tolerance ± 1
- Automatic in-feed with optic sensor
- Adjustable temperature from 50°C up to 250°C
- LCD display
- 10m/min sealing speed
- Adjustable seal distance
- Automatic standby mode
- Built-in printer
- Seal date, expiry date, lot number and operator code printable
- Adjustable font width
- Printer can be activated & deactivated
- Globally understandable coding. No need for language feature
- Batch counter
- Clock and calendar feature

PRODUCT NAME:

ROLL DISPENSER & CUTTER

PRODUCT CODE
WM MSS 102

PRODUCT DESCRIPTION:

- Double rack design
- Stainless Steel frame
- Nylon bearing for hygienic use
- High quality cutting blade
- Easy blade replacement

STERILIZATION CONTROL PROCEDURES

PRODUCT CODE
WM SI 100

PRODUCT NAME:

BOWIE & DICK TEST PACK

- Disposable, pre-assembled and ready to use test packs
- Designed for STEAM sterilisation at 134°C – 3.5 minutes
- Clean and accurate indicator color change
- Indicator sheet can be kept as a permanent record
- Validated for 4kg and 7kg sterilization load
- Manufactured in absence of lead and other heavy metals.

PRODUCT NAME: CLASS 4 STEAM INDICATOR

PRODUCT CODE
WM SI 102

- Dual strip design
- Designed for STEAM sterilization at 134°C – 3.5 minutes
- Water based, non-toxic chemical indicator
- Clear and accurate color change
- Manufactured in absence of lead and other heavy metals

PRODUCT NAME: CLASS 5 ETO INDICATOR

PRODUCT CODE
WM SI 103

- Dual Strip design
- Designed for Ethylene Oxide (EtO) sterilization
- Water based, non-toxic chemical indicator
- Clear and accurate color change
- Manufactured in absence of lead and heavy metals

PRODUCT NAME: CLASS 6 STEAM INDICATOR

PRODUCT CODE
WM SI 104

- Single Strip design
- Designed for STEAM at 134°C – 3.5 minutes
- Designed for STEAM at 121°C – 15 minutes
- Water based, non-toxic chemical indicator
- Clear and accurate color change
- Manufactured in absence of lead and heavy metals

PRODUCT NAME: ADHESIVE STEAM & ETO LABEL

PRODUCT CODE
WM SI 105

- Double sided self-adhesive label
- Designed for STEAM and ETO
- Non-toxic and lead free process indicator
- Accurate indicator color change
- Conforms to ISO 11140-1

PRODUCT NAME: AUTOCLAVE TAPE

PRODUCT CODE
WM SI 106

- Steam and EtO Autoclave Tapes
- Available without indicator
- Clean peel from wrap
- Accurate indicator color change
